

## Public Charter Schools: Fact vs. Fiction

With misinformation about public charter schools continuing to circulate throughout the media, the executive and legislative branches of state government, local officials and the general public, the [Keystone Alliance for Public Charter Schools](#) has created the attached handout to assist the public brick-and-mortar charter school community in dispelling the myths about public charter schools and pushing back against the anti-charter school movement.

The attached Public Charter Schools: Fact vs. Fiction document can be used in your public relations outreach efforts to correct the record on public charter schools.

The Keystone Alliance encourages all public brick-and-mortar charter schools to use and share the attached handout when speaking with the media; meeting, writing or speaking with lawmakers and local officials; participating in education events; and speaking with the general public and prospective students and families.

If you have any questions, please do not hesitate to contact me.

Thank you.
